Cloner le dépôt github

Cloner le dépôt github

The screenshot shows the GitKraken application window with the 'Repository Management' panel open. The 'Clone' tab is selected, displaying a list of providers on the left and a 'Clone a Repo' panel on the right. A red arrow points from the 'Where to clone to' field to a pink box containing the text 'Mettre le sous dossier qui accueillera le dépôt local git'. Another red arrow points from the 'Repository to clone' dropdown menu to a pink box containing the text 'Choisir le dépôt distant'. The dropdown menu is open, showing a list of repositories with 'plp2021_G2' selected. A 'Clone the repo!' button is visible at the bottom right of the 'Clone a Repo' panel.

Repository Management

Changer de branche

The screenshot shows the Visual Studio Code interface with the Git Explorer on the left and a commit diff on the right. The repository is named 'pip2021_G2' and the current branch is 'Nicolas'. The commit history shows several commits, with the most recent being 'Add a helper for the use of github' 12 hours ago. The commit diff on the right shows the changes for the commit 'c42364' by 'nicolas-enjalbert' (parent: 46cbb4), which includes the file 'note'.

Repository: pip2021_G2

Branch: Nicolas

Commit History:

- Add a helper for the use of github (12 hours ago)
- Add research file to save some article or libraries (2 weeks ago)
- Add HTML lesson (2 weeks ago)
- Add Scraping tutorial
- Add helper
- Update french_reflection_draft.md
- TP + dataSet
- Merge branch 'main' of https://github.com/nicolas-enjalbert/pip2020...
